PREFACE

This report provides detailed results related to migrant education for each question in the district's 2008-09 administration of the *California School Climate Survey* (CSCS) to teachers, administrators, and other school staff, presented in tables organized by topic. The tables compare the results reported by staff who provide services to students under the migrant education program (MEP) compared to all other staff. To help in understanding and interpreting these results, review these findings along with the *CSCS Survey Content Guidebook* (cscs.wested.org), *Workbook,* and other tools described below.

Results of this student survey should be compared to those obtained from migrant education students in the companion report of the *California Healthy Kids Survey (CHKS)*, which was administered at the same time. It is important to determine how consistent MEP staff perceptions are to student self-report of their behaviors and experiences. The CSCS Survey Content Guidebook provides a cross-walk between the surveys' questions to facilitate such comparison.

The CSCS, along with its companion *California Healthy Kids Survey*, administered at the same time to students, is a service of the California Department of Education (CDE). For additional information and resources, visit the survey websites: chks.wested.org and cscs.wested.org.

This migrant education program report is provided to you courtesy of the CDE Migrant, Indian and International Education Office (MIIEO) to help your district better identify, understand, and address the specific needs of MEP students and staff, as well as meet the requirements of the forthcoming state MEP plan. They were funded in response to the gaps in data identified by the state's 2007 *Comprehensive Needs Assessment* of its migrant education program.

SURVEY PURPOSE

The CHKS and CSCS form the largest, most comprehensive effort in the nation to assess *local* students and staff on a regular basis to provide key data on learning barriers, engagement, and supports. The CSCS was developed by WestEd in 2004 for the CDE Safe and Healthy Kids Program Office to fulfill the requirement in the *No Child Left Behind Act* (NCLB) of 2001 Title IV that schools conduct an anonymous teacher survey related to student drug use and violence. Recognizing the opportunity this requirement presented, CDE expanded the content to collect data to guide school improvement efforts in general, and also made it possible for districts to add questions of their own choosing so that the survey could better meet local data needs. Because the results are anonymous and confidential, the survey provides staff with an opportunity to communicate honestly their perceptions about the school without repercussions. The data are provided to districts to guide their own efforts to improve schools and better meet the needs of students and staff.

The CSCS (as well as the CHKS) grew out of CDE's commitment to helping schools promote the successful cognitive, social, and emotional development of all students. Equally of concern is fostering positive school working environments, particularly to help address the growing problem of teacher retention. The CSCS report provides a perspective on the degree to which staff perceive their schools have safe, supportive, caring, collegial, challenging, and engaging learning and working environments with norms and standards that encourage academic success. Taken as a whole, the survey questions map to the three pillars emphasized by many school reform efforts — Rigor, Relevance, and Relationships. In conjunction with CHKS student data, the CSCS enriches a school's ability to create a positive school climate that promotes quality teaching, school connectedness and academic achievement, and well-being among both students and staff.

Closing the Achievement Gap

In 2008-09, questions were added to provide better data to advance the efforts of schools to close the state's persistent racial/ethnic achievement gap (the CTAG Initiative). These questions, reported in Section IV assess the respect shown to students, equity and diversity, and cultural sensitivity.

Comparison with CHKS Results

Another broad goal was to provide data from school staff comparable to student self-report information from the CHKS, so that districts can ascertain whether staff perceptions accurately reflect student behaviors and experiences. The *CSCS Guidebook to the Survey Questions* provides a crosswalk between CSCS and CHKS questions and discusses how they might be compared.

SURVEY CONTENT OVERVIEW

The questions were selected with the assistance of an advisory committee to assess the key school climate variables that research and theory indicated are most associated with successful learning and teaching. Like most school climate surveys, it focuses on individual behaviors, patterns of communication and interactions, and professional and student supports. For a detailed discussion of the significance of each question, see the *CSCS Survey Content Guidebook*.

Questions are divided into three modules. The first Core section is answered by all staff. Two additional modules target staff with responsibilities for *learning supports* and *special education*. These group-specific modules ask for more program- and issue-specific information that might not be known to other staff. Keep in mind that these two modules are answered only by sub-samples of all respondents. Tables 8.1 and 9.1 provide the number of staff who completed each of these modules.

Core Survey (Section 1)

All staff answer the questions in the first part of the survey. It provides background information about the characteristics of the staff respondents that completed the survey (Tables 1.1-1.6), including whether they provide service to migrant students. This information was used to categorize staff for this report. The following describes the main domains assessed:

- How supportive and inviting is the learning and working environment in general (Tables 2.1 and 2.6);
- School norms and standards that promote achievement, including the rigor and relevance of instruction, shared sense of responsibility for school improvement, (Tables 2.2-2.5, 2.7);
- Supports, professional respect, and collegiality within the working environment, factors that surveys of California teachers has shown to be key to teacher retention, as well as facilities maintenance and parent involvement (Tables 2.5-2.10, 2.19-2.20);
- Staff and student safety (Tables 2.17-2.18);
- Student developmental supports — caring staff-student relationships, high expectations, and opportunities for meaningful participation and decision making— in the school environment that resilience research has linked to school (and life) success (Tables 3.1-3.10);
- Equity, respect, and cultural sensitivity, particularly germane for closing the achievement gap (Tables 4.1-4.13);
- Student behaviors that facilitate learning, including the degree to which students are ready and motivated to learn and are well-behaved (Tables 5.1-5.8);

- The level of problems the school experiences related to fourteen student behaviors or conditions (e.g., truancy, violence, bullying, substance use, mental health, and physical health) (Tables 6.1-6.8);
- The nature, communication, and enforcement of discipline-related rules/policies (Tables 7.1-7.5); and
- Staff professional development needs (Tables 2.12-16; 3.10, 4.10-4.13).

Learning Supports Module (LSM)

The Learning Supports Module (Tables 8.1-8.24) consists of 23 questions that are answered only by "practitioners" who provide services or instruction related to health, prevention, discipline, safety, or counseling. These questions assess the level of student programs, supports, services, and teacher professional development. The results can be compared to the level of need as indicated by staff perceptions of problems (from the first section of the CSCS) and student report (from the CHKS).

Special Education Supports Module (SESM)

The Special Education Supports Module (Tables 9.1-9.25) consists of 24 questions designed to be answered only by staff who have responsibilities for teaching or providing related support services to students with IEPs. It provides data to better understand issues involving: (1) effectively meeting the needs of student with IEPs; and (2) recruiting, training, and retaining special education staff. The CDE Division of Special Education is providing special reports to districts that compare all the CSCS results as reported by staff with special education responsibilities versus other staff.

Survey Administration and Sample

The CSCS is an online survey administered in the same schools at the same time as the CHKS among all staff in grades 5 and above.[1] Schools administered the survey following detailed instructions provided by CDE. Staff participation was totally voluntary, anonymous, and confidential. The tables in Section 1 (Sample Characteristics) provide the number of respondents who completed the survey, their roles at the school (e.g., teacher, administrator, counselor), length of employment at the school and in their position, and their race/ethnicity.

The Report

The tables are organized into nine topical areas, as outlined in the Table of Contents. Summary tables at the beginning of the report (identified by the letter "S" before the table number), provide key indicators in each area for a quick overview. The results side-by-side for the three traditional school types — elementary (grades 1-6), middle (grades 7-8), and high schools (grades 9-12) — as well as for nontraditional continuation schools that serve students at risk of school failure (ungraded, with 16 years being the earliest age of admittance).[2] The tables are especially useful for examining differences in school climate perceptions among migrant education staff between the major types of schools. Percentages are rounded off to the nearest whole number.

Addressing the Needs of Other Groups and Closing the Achievement Gap

This supplementary migrant education report is part of a larger effort to expand both the CHKS and CSCS to provide better data for identifying and meeting the needs of underperforming subgroups of students among California's diverse population of students, particularly in closing the achievement gap

---

[1] In some instances, the survey is also administered on paper.

[2] For reporting purposes, K-8 schools are coded as elementary.

(CTAG) that has long persisted between white students and non-Asian minorities. Other supplementary reports are being prepared examining how survey results vary among students based on their race/ethnicity, whether they are participating in the migrant education program, and whether they report indicators of poor mental health (depression risk or suicide contemplation). Each report is designed to support special state programs.

AIDS TO UNDERSTANDING AND USING THE DATA

In addition to the ***CSCS Survey Content Guidebook***, there are several other guides, workshops, and other aids to help you understand and use survey results. These are described and made available on the survey website. Two are particularly important.

- The CHKS ***Data Use and Dissemination Guidebook*** describes a step-by-step process for reviewing, analyzing, and disseminating your results as part of a data-driven decision making process for program improvement. Free call-in data use workshops are offered as well.
- A ***Workbook on Improving School Climate and Closing the Achievement Gap*** provides a practical guide to using the data in the framework of improving academic achievement and well-being among all students and closing the achievement gap. It provides examples of how to use the data to improve practice and policy within a migrant education program. A workshop accompanying this Workbook will be available in 2010.

ASSESSING THE DATA

Care must be taken to fully understand the survey, the context within which the data were collected, and the factors that can impact the quality, validity, and generalizability of the results. The following are a few of the key issues that should be kept in mind. A detailed discussion occurs in the *CHKS Data Use and Dissemination Guidebook*.

Representativeness

Among the most important factors affecting the quality of survey results is the level of staff participation. The validity and representativeness of the results will be adversely affected if the staff response rate is lower than 60%. One indication of the survey's representativeness is how accurately the characteristics of the sample (see Section 1) reflect the characteristics of the district's staff as indicated by personnel records. Even if the response rate is low, the results provide an indication of what those staff who did respond felt about the school and their experiences and behavior. Discussed below are strategies for increasing participation.

Comparison Data: Statewide Results

Comparing district results to other local, regional, and state data provides a broader context with which to assess the local situation. They can help you determine whether your district results are unique or may be part of a larger trend. All district migrant education reports are being posted publicly on the CSCS website, as well as aggregated (combined) results for each Regional Migrant Education Center area and statewide. All district migrant education reports are also available through the Migrant Student Information Network (MSIN). Ultimately, however, the most fundamental concern should not be how you compare with others but your own satisfaction with the survey results and what they tell you about the functioning of the migrant education program in your district.

IMPROVING PARTICIPATION

The *CSCS Survey Administration Guidebook* provides strategies for improving voluntary participation, but one of the most important is raising awareness among staff of the value of the survey to the school and the value of staff input. To that end, it is important that staff are informed about the results and any

school-improvement efforts the district is undertaken in response. As discussed below, it is also important to discuss the results and what should be done with them. *Staff must perceive that their voice is heard and valued.*

NEXT STEPS

Receiving this report is just a beginning step in the process of using data to improve the migrant education program. Recipients are urged to send copies of the report to the director of their Regional Migrant Education Center (RMEC), and to review the findings with the RMEC director to identify the most significant results and their program implications. The following describes further actions that you can take.

Request School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies).

Compare with Other Data Sources

CSCS results will be enriched if analyzed in the context of data from other sources, particularly in identifying consistent patterns. Other data typically collected in effectiveness studies of school climate include number and kinds of discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

Discuss with Staff

Discuss the results with staff to explore their meaning in more depth. Obtain their input into how the school and the migrant education program might be improved. This is especially important because it communicates to staff that you value the input into how to improve the school climate and programs, and may help improve participation in the next survey.

Conduct Additional Analyses of The Dataset

The complete dataset is available electronically for additional analysis (there is a small fee for preparation). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of staff and across schools within the district.

Add Questions to your Next CSCS

Determine what additional information is needed from staff to guide school improvement efforts and add questions to your next CSCS or CHKS. Both surveys were designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.
