[District/COE/School Name]. *California Healthy Kids Survey, 2013–14: Main Report*. San Francisco: WestEd Health & Human Development Program for the California Department of Education.

# PREFACE

This report provides the detailed results for each question from this school/district’s 2013–14 *California Healthy Kids Survey* (CHKS), presented in tables organized by topic. In addition to this Main Report, the *CHKS Key Findings* provides a summary of selected results with graphic presentations and short discussions. To help in understanding and interpreting these results, the *CHKS Guidebook* to survey content discusses the significance of each question. Several other tools to help in data use are also available, as described below.<sup>1</sup>

The CHKS, along with the *California School Climate Survey* (CSCS) for staff and the *California School Parent Survey* (CSPS), is a service of the California Department of Education (CDE). These three surveys form the California School Climate, Health, and Learning Survey (Cal-SCHLS) System, the largest, most comprehensive effort in the nation to assess students, staff, and parents at the *local* level on a regular basis to provide key data on learning barriers, engagement, and supports. For additional information and resources, visit the survey website: [chks.wested.org](http://chks.wested.org).

The results of this student survey should be compared to those obtained from school staff and parent surveys. It is important to determine whether staff and parent perceptions accurately reflect student behaviors and experiences. The *CHKS Guidebook* to survey content provides a crosswalk between student and staff survey questions to facilitate this comparison. Combined, the CHKS and CSCS provide a comprehensive assessment of the school climate and the needs of students and staff, to guide school improvement efforts.

## ***SURVEY PURPOSE***

The California Department of Education (CDE) funded the CHKS in 1997 to provide data that would assist schools in (1) preventing youth health-risk behaviors and other barriers to academic achievement; (2) promoting positive youth development, resilience, and well-being; and (3) fostering positive school climates and engagement in learning. A thorough understanding of the scope and nature of youth behaviors, attitudes, and learning conditions is essential to guide school improvement efforts and to develop effective prevention, health, and youth development programs. These surveys grew out of CDE’s commitment to helping schools promote the successful cognitive, social, and emotional development of all students and create more positive, engaging school environments for both students and staff.

## ***SURVEY CONTENT OVERVIEW***

The CHKS consists of a required general Core Module and a series of optional, supplementary topic-focused modules that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table A1.1 indicates the modules administered by the district. The Core Module consists of a broad range of key questions, identified by an expert advisory committee, that are considered most important for schools to administer to guide improvement of academic, health, and prevention programs and the promotion of student achievement, positive development, and well-being.<sup>2</sup> The primary focus of the Core Module is assessing student perceptions and experiences related to school climate and engagement, learning

---

<sup>1</sup> *Guidebook for the California Healthy Kids Survey, Part II: Survey Content* ([chks.wested.org/training\\_support](http://chks.wested.org/training_support))

<sup>2</sup> *Guidebook for the California Healthy Kids Survey, Part I: Administration* ([chks.wested.org/training\\_support](http://chks.wested.org/training_support)) provides detailed information about the content of all of the survey modules. The modules themselves can be downloaded from [chks.wested.org/administer/download](http://chks.wested.org/administer/download).

supports, and health-related, non-academic learning barriers (e.g., substance use, bullying and violence, and poor physical and mental health).

### **School-Related Content**

To support school improvement efforts, the majority of questions on the CHKS assess school performance, engagement, climate, performance, and experiences. The survey provides self-reported data on:

- grades, truancy, and school connectedness, as indicators of engagement;
- the levels of students' experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school, three fundamental developmental supports (protective factors) that promote positive academic outcomes;
- perceived safety and perceived frequency of, and reasons for, harassment and bullying at school; and
- levels of substance use, violence, and crime-related behavior (e.g., weapons possession) at school.

### **Closing the Achievement Gap**

Several tables are particularly useful for helping districts identify and address student needs related to closing the state's persistent racial/ethnic achievement gap, which former Superintendent O'Connell declared CDE's top priority. On the CHKS, students are asked to indicate their racial/ethnic identity and to report whether they have experienced harassment because of their race/ethnicity. Summary tables also provide key findings (e.g., harassment, developmental supports, school connectedness) disaggregated by race/ethnic categories. A supplementary module is available that assesses student attitudes and experiences related to equity, diversity, cultural sensitivity, and respect. CDE urges schools that are experiencing achievement gaps among their students to administer the Closing the Achievement Gap module and request supplementary reports disaggregating all their CHKS results by the race/ethnicity of students.

## ***SURVEY ADMINISTRATION AND SAMPLING***

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Each student's participation was voluntary, anonymous, and confidential. Table A1.2 gives the target sample of students and the final number and percent of students who completed the survey (the participation response rate).

## ***THE REPORT***

The tables in this Main Report, organized by topic, provide the percentages responding to each question response option by grade level. Because it is just as important to identify the positive behaviors of youth as it is to identify the risks they face, the tables reporting risk-behavior data include the percentages of youth who responded negatively (did not engage in the behavior).

## ***AIDS TO UNDERSTANDING AND USING THE DATA***

Several guides, workshops, and other aids are available to help you understand and use survey results. These are described and made available on the survey website. Three are particularly important.

- To help in understanding and interpreting these results, *Guidebook for the California Healthy Kids Survey, Part II: Survey Content* ([chks.wested.org/training\\_support](https://chks.wested.org/training_support)) provides a detailed explanation of each question and its significance (why it was asked) and the potential implications of the results for programs.
- The *Guidebook for the California Healthy Kids Survey, Part III: Data Use and Dissemination* ([chks.wested.org/training\\_support](https://chks.wested.org/training_support)) a step-by-step process for reviewing, analyzing, and disseminating survey results as part of a data-driven decision-making process for program improvement. Free call-in data use workshops are offered as well.
- *A Workbook on Improving School Climate and Closing the Achievement Gap* provides a practical guide to using the data in the framework of improving academic achievement and well-being among all students and closing the achievement gap. It provides examples of how to use the data to improve practice and policy.<sup>3</sup>

## ***ASSESSING THE DATA***

Care must be taken to fully understand the survey; the context within which the data were collected; the factors that can impact the quality, validity, and generalizability of the results; the changes that occurred between administrations. The following are a few of the key issues that should be kept in mind. A more detailed discussion of these topics can be found in the *CHKS Data Use and Dissemination Guidebook*.

### **Representativeness**

Among the most important factors affecting the quality of survey results is the level of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 60%. One indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the district's student enrollment. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

### **Changes Between Surveys**

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase after holidays or social events).

---

<sup>3</sup> The Guidebooks may be downloaded from [chks.wested.org/training\\_support](https://chks.wested.org/training_support), and the Workbook from [chks.wested.org/about/ctag](https://chks.wested.org/about/ctag).

## **Comparison Data**

Tables 9.1 and 9.2 provide comparisons of selected results to state and national data. Comparing district results to local, regional, state, and national benchmarks provides a broader context with which to evaluate the local situation. They can help determine whether changes in results are locally unique or may be part of a larger trend, possibly affected by broad social forces.

Ultimately, however, the most fundamental concern should be what the survey results say about the students and schools and what improvements need to be made.

## ***NEXT STEPS***

Receiving this report is just a beginning step in a data-driven decision-making process. The following actions can be taken to analyze and use the results and provide additional information to support school and program improvement efforts.

### **Compare with Other Data Sources**

CHKS results will be enriched if analyzed in the context of data from the CSCS and other sources, particularly in the context of identifying consistent patterns. Other data typically collected in effectiveness studies of school climate include numbers and kinds of discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

### **Discuss with Students and Staff**

Discuss the results with both students and staff to explore the meaning of the results in more depth and to obtain their input into how the school might better meet the needs identified. This is especially important because it communicates to students that you value their input into how to improve the school and gives them an opportunity for meaningful participation. As such, it helps improve their perceptions of the developmental supports and opportunities that the school offers and their school connectedness. Cal-SCHLS staff can provide information on conducting structured group *Listening to Students* fishbowls designed to explore with students, with staff observers, the meaning of survey results and obtain their input on how to address the needs identified by the survey.

## ***ACKNOWLEDGMENTS***

The CHKS was developed, and this report was prepared, by WestEd, in collaboration with Duerr Evaluation Resources, under contract from the California Department of Education Coordinated School Health and Safety Office. For more information, call the toll-free helpline at 888.841.7536, or visit the website at [chks.wested.org](http://chks.wested.org).

**Table A4.18**

***Occurrence of Problems while Using Alcohol/Drugs***

---

Does not apply, never used alcohol/drugs

---

Problems with emotions, nerves, mental health

---

Trouble or problems with the police

---

Money problems

---

Miss school

---

Problems with school work

---

Fight with other kids

---

Damage a friendship

---

Physically hurt or injure yourself

---

Unwanted or unprotected sex

---

Forget what happened or pass out

---

Other problems

---

More than one problem

---

Never had problems when I've used alcohol/drugs

---

*Question HS A.90: Has using alcohol, marijuana, or other drugs ever caused you to have any of the following problems?*

*(Mark all that apply.)*

*Please note: Because all that apply are marked, total percentages may exceed 100%.*

**Table A4.19**

***Occurrence of Experiences Related to Dependency while Using Alcohol/Drugs***

---

Does not apply, have not used alcohol or drugs

---

Had to increase use to get same effect as before

---

Spent a lot of time getting, using, or being "hung over" from using

---

Used alcohol or drugs a lot more than intended

---

Used alcohol or drugs when alone

---

Alcohol/drug use often kept you from going to school, working, recreational activities or hobbies  
Often didn't feel OK unless had something to drink or used a drug

---

Thought about reducing or stopping

---

Told yourself not going to use, but used anyway

---

Spoke with someone about reducing or stopping use

---

Attended counseling, program, or group to reduce/stop use

---

More than one experience

---

Use alcohol or drugs, but have not experienced any of these things

---

*Question HS A.97: If you use alcohol, marijuana, or another drug, have you had any of the following experiences?*

*Mark all that apply.*

*Please note: Because all that apply are marked, total percentages may exceed 100%.*
